## PROJECTS

**JMALL.JO (GRADUATION PROJECT)**
it is an e–commerce site . It transforms the idea of traditional shop into electronic shop so , the seller can create online shop in website and sell the products and doing the commercial operations through it
and there is an integrated delivery service inside site, dealing with Google Maps, and there is also a complete system administrator control panel to do some tasks such as approving shops and drivers, and assigning drivers to deliver orders, displaying users and shops and Statistics,  etc .
The most important features supported on the website
, multiple language (Arabic, English) , and completed notifications system , Comments system ,and verification email feature, and reset password , Remember me, and Calculate the shortest distance on the map between the shops and the place of delivery of the order ,Sessions security, pagenation system,etc.

The techniques used:
PHP, MYSQL, OOP, HTML, CSS, Bootstrap, JS, JQuery, AJAX, API's, Google Maps and Charts,

This system was built by me and two of my colleagues , and I worked on (Back end, Front end (JS, JQuery , Ajax, Api's) )

## TECHNICAL SKILLS

- PHP
- SQL Commands , MySQL
- OOP and MVC Pattern
- C++ (STL)
- HTML , CSS
- Intermediate knowledge in JavaScript and Jquery
- JSON, AJAX
- Rest Api
- Git and Github

## PERSONAL SKILLS

- Team work
- Self learning
- Problem Solving
- Hardworking

## EDUCATION HISTORY

**AL–ALBAYT UNIVERSITY**
Bachelor of Computer Science, Feb 2018 – Present

## LANGUAGES

- Arabic (native)
- English (intermediate)

## CERTIFICATES

- **ACM ICPC ID**
